

# STRATEGY

First I clicked out <sup>on</sup> all the grey circles and then I clicked on the the counters which were forming square.

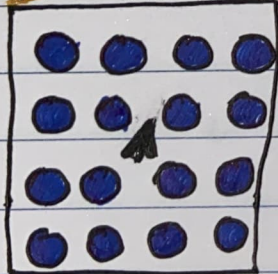

Then I checked out from all the sides that wether it is making square or not. Afterwards I checked out how many counters I used that were 9.

Then I took a look on the solution which I got. I checked that wether I can add more counters or not.

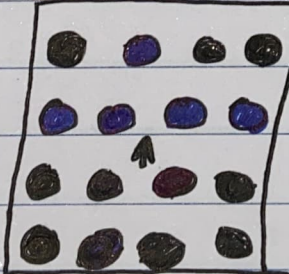

At the end I got that 9 is the maximum number which I can add as ~~as~~ the counters

## SOLUTION IN IMAGES

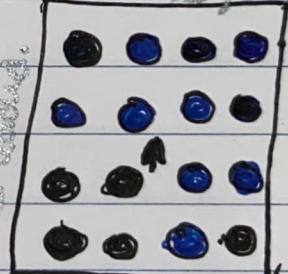

1- filled all the counters

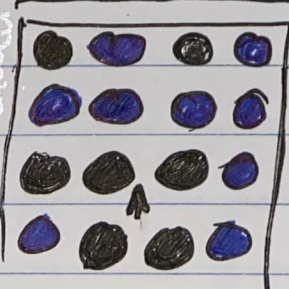

2- clicked on squares forming side.

3- checked from all side wether making square or not.

no more counters can be added

9 is the maximum no. of counters can be added.
