

It is not possible because all the numbers in the bags are odd numbers.  
If you add 10 odd numbers together you always get an even number.

We managed to do it in 9:  
5, 5, 5, 5, 5, 5, 5, 5, 5

We also did it in 11:  
7, 7, 5, 1, 3, 1, 1, 3, 1, 1, 7

You have to get an odd number of odd numbers to get an odd total.
