

Magic Letters

We think that Charlie meant that if both columns of numbers add to the same number, it's a Magic V. So Alison's V's columns added up to the same number, making it a Magic V. That's why Charlie said, "That's really just the same as mine!"

Yes we found more Magic V's with numbers 1-5.

You know when you found all the possibilities when you have used up or added up all the numbers from 1-5 to sum up to a certain number.
