

SEA LEVEL BAR CHART

SEA LEVEL

Using my Bar Chart, I am able to easily answer the questions asked:

1. What number should be where the head of the seagull is? 4
2. What number should be where the mouth of the crab is? -9
3. How far up is it from the head of the shrimp to the mouth of the shark? 2 metres
4. How far from the surface is the eel's mouth? 7 metres
5. How high above the sea level is the seagull's beak? 4 metres
6. How far is the seagull's beak from the seahorse's mouth? $4+3 = 7$ metres

I am also able to use my Bar Chart to answer many additional questions, such as:

Q. How far is it from the top of the lighthouse to the Ray's mouth?

A. $6+8 = 14$

Q. If the sea rises 4 metres above sea level, which animal will the sea be level with?

A. Seagull
