

Example 1:
10 water
60 lemon juice
This would be stronger
than example 2

Example 1 diagram:

Less water than lemon juice means the lemonade will be stronger tasting. So if I added 40% water and 60% lemon juice the lemonade would be stronger.

Example 2 diagram:

Example 1:
96 water
4 lemon juice
This would be weaker
than example 1

lemon juice
water
