

# 'Shapes in a Grid' printed from <http://nrich.maths.org/>

## [Show menu](#)

Can you find which shapes you need to put into the grid to make the totals at the end of each row and the bottom of each column?

				<input type="text" value="11"/>	
				<input type="text" value="9"/>	
				<input type="text" value="10"/>	
				<input type="text" value="14"/>	
<input type="text" value="14"/>	<input type="text" value="12"/>	<input type="text" value="13"/>	<input type="text" value="5"/>		

The shapes stand for four different numbers less than ten.

You might like to try using this interactivity.
