

NRICH

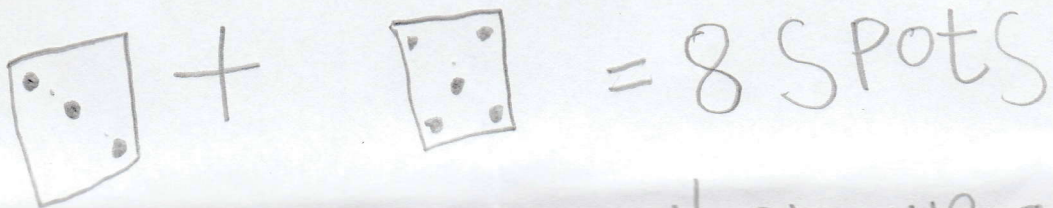

Odd numbers = 1, 3, 5, 7, ...

Even numbers = 2, 4, 6, 8, ...

I choose two odd numbers 3 and 5 and add them

$$3 + 5$$

I will use dominoes

$$\begin{array}{|c|} \hline \cdot \\ \hline \cdot \\ \hline \cdot \\ \hline \end{array} + \begin{array}{|c|} \hline \cdot \\ \hline \cdot \\ \hline \cdot \\ \hline \cdot \\ \hline \end{array} = 8 \text{ SPOTS}$$

I noticed that when we add two odd numbers, we get an even number.
